Our Flame Cut Table features a plasma torch and Oxy Acetylene for Superior Cutting Quality.

Our in-house engineering department can help with your design needs.

Our welders utilize both Heavy and Light Mig Arc-Wire-Feed Welding.

An operator controls the HE&M Horizontal Pivot Band Saw as it makes a straight cut with ease.

The Kitamura CNC Bridge Mill allows for large part and weldment machining.

The Cincinnati Hypro Boring Mill turns raw materials at speeds that range from 1.1 to 43 RPMs.

Shown above is our 65,000 SQ FT Manufacturing Facility located in Brownsdale, MN.

Here is our loading bay, one of the numerous areas that we have for loading and unloading.

Throughout our facility, we have a total of eight cranes that range from 15 to 30 ton capacity.
